QUAKER HILL FITNESS TEST

HOW TO BE THE BEST

Fitness Testing occurs once a year for students in grades 3-12 all over the country. There are 4 different methods of testing that calculate a student, and schools, fitness levels through various exercises. Muscular Strength, Muscular Endurance, Flexibility, and Cardiovascular Endurance are all measured during Fitness testing. Throughout the year we practice all 4 areas of testing through different games, exercises, and warm up activities. However, a 45 minute class once a week is not enough! We need help from parents and guardians to show the importance of practice outside of school! Practice before bed, or on the weekends, to help improve our schools overall fitness!

MUSCULAR STRENGTH

Otherwise known as our "Push-Up Test", this is Quaker Hills biggest area of need. Push-ups are difficult for all ages, especially if you do not practice often. The test is given through a 3 second "cadence" that goes "Down...up...down...up" at which time students are performing push ups. Students must have a flat back during the test, and go down to 90 degrees and back up. Start with 1 or 2 push-ups a night, then gradually increase over time!

FLEXIBILITY

Generally Quaker Hills highest scoring test for girls, the "Sit and Reach Test" measures the flexibility of students in each leg. Students sit on the floor with shoes off, and one leg at a time measure how far they can reach on a "Sit and Reach Test box". No need to build or buy a box for practice at home, just simply take a couple minutes each night to practice stretching both legs. It is a great way to cool down your body before going to bed!

MUSCULAR ENDURANCE

Our "Curl-Up Test" follows the same cadence as our push up test. Students lay flat on their back with their legs bent and feet FLAT on the floor. Feet CANNOT lift off the floor when performing curl ups. Students hands lay flat on the floor and on the "up" cadence students raise their bodies up and slide their hands 4 inches across the floor. On the "down" cadence, students lay all the way back down, making sure to put their heads back on the floor.

CARDIOVASCULAR ENDURANCE

The "Pacer Test" measures a students cardiovascular endurance, simply put, how long they can run without stopping. The test follows a "beeping cadence" where students must run from one line to another, before the "beep" occurs. Over time the test will increase speed, forcing students to run faster with less time to rest. This is our HARDEST test and it is important to remember running is difficult. Try to be active as much as possible, and run/jog/walk when weather and time allows.

Scoring For Fitness Testing:

Our goal each year is to be in the “Healthy Fitness Zone” for each test. At Quaker Hill we follow the 20-Meter Pacer test. Each test varies depending on the age of the student at the time of testing. Take a moment to look over scores with your QH student, and understand how to prepare for the upcoming testing!

Standards for Health-Related Fitness Zones
